

Host-IT operates a rapidly growing network of regional edge data centres which are highly secure and have great connectivity. Designed to meet the demands of modern businesses who need colocation services close to both their operations and their customer base.

All of our services come with full UK based support, transition and on-boarding with simple contracting to make sure your data operations keep running smoothly.

Our Chester data centre delivers secure edge data hosting with fast connectivity, low latency and reduced transit costs for the North West of the UK.

The data centre is conveniently located between Chester and Manchester and is easily accessible from the M56. It has excellent colocation services and offers secure business recovery services.

Profile

- Set in 3.4 acres of land the data centre is a 155,000 sq. ft building built to the highest standards.
- Meeting rooms, office space and kitchen facilities
- 24/7 access & on-site support.

Host-IT has over two decades of expertise in managing data centres and providing comprehensive connectivity solutions. Our offerings encompass a wide range of fully managed services, including advanced managed firewall protection where required, with bandwidth options spanning from 10MB to 100GB across highly reliable, redundant networks. We streamline our clients' experience by consolidating colocation, power, and connectivity charges into a single invoice, reducing administrative burdens. Moreover, our dedicated help desk is always ready to support all the services we offer, ensuring seamless operations for your business.

Services Available

Host-IT can supply the following range of services from this location:
